### Herbology Native healing

Herbology provides nontoxic and natural cosmetic products that will nurture your body, leaving it smooth and satisfied. For instance, the combination of their herbal salt body scrub and healing foot salve completes a foot ritual that is beneficial to the body. The scrub is oil-based containing grapeseed oil and including antifungal ingredients such as dead sea and mineral salt. As for the ritual, start by scrubbing your feet with the Herbal Salt Scrub and focus especially on the nails. Leave the scrub on your skin for some minutes so the minerals can enter the bloodstream and balance out the body. Afterward, pamper and massage your feet with the multidimensional healing foot salve. Your feet will definitely thank you later...In addition, Herbology is an eco-friendly brand that will gratefully refill the empty containers of their products and so provide you with a discount on your next purchase.
